

Rules of the Big House

*She is aging gracefully and needs TLC!
Fire and old electrical wiring/plumbing are her enemies!*

- No smoking/vaping inside the house. Dispose of butts.
- No recreational drugs on the property.
- Close cabinets and drawers tightly to discourage mice.
- At night, put all food away. Close the kitchen door into the back hall.
- No food, drink, or glass upstairs.
- Replace hand soap (in all bathrooms), dish detergent, toilet paper, paper towels, and laundry detergent. Replace propane for grill if low.
- Make sure fireplace flues are open before lighting a fire. Use longer pieces of wood for the fireplaces and shorter pieces for the kitchen stove. When leaving the room, put up the fire screen and brace it with the fire fork. Use a metal bucket to empty ashes (when cool) into the fire pit outside. Never burn colored paper in the house.
- If you have electrical devices charging, unplug them before leaving an empty house.
- Think green! Recycle glass, plastic, metals, paper, and clean cardboard using buckets in the garage. Save water by jiggling handles and turning off dripping faucets. Turn off lights not being used. (Lightbulbs located in the tall white cabinet in the workshop). No feminine products or flushable wipes down the toilet.
- Do not use any pesticides on the property.
- Clean up after your pets - inside and out!
- All garbage/trash needs to be taken to the dump in large purple bags.
- Lock house and garage doors if everyone leaves.

Leave Butterhill better than you found it!
